

DigiTel Mobile™ is an Italian
Wireless Service Provider
focusing on professional
Message Services (SMS
Services) operating on-line
since 1996.

DigiTel Mobile™ offers new and smart wireless services to Corporations, Industrial, Agencies and ISPs, integrating the computer solutions with the mobile world.

DigiTel Mobile™ provides tools and solutions for MT/MO traffic, 2Way services, IM, SMSCs direct access. Companies use our standard inbound and outbound services to provide information, entertainment and communications services to consumers or business users.

DigiTel Mobile™ Gateway is a scalable telco-grade system for person-to-person as well application-to-person and machine-to-machine messaging of rich multimedia content. Multi-operator routing guarantee performance and 24x7x365 availability.

Manage 2Way SMS traffic from one or multiple alias GSM numbers.

SMSalias™ provides the user with a virtual mobile number and an easy to install add-in for email client.

Users that receive the text message on their phone can reply back with an SMS that will be received back directly via email.

SmsXSend is a software utility that enables you to easily send and receive text and binary "Short Messages" (via TCP/IP) from your local PC or network to GSM operators.

The architecture is based on the SMSEngine Service and the DWS (Web Server).

The SMSEngine is the core of the software and handles the SMSC connectivity via EMI/UCP, CIMD2, SMPP Interface.

With direct connections to major GSM networks like Vodafone, TIM, Wind, O2, Swisscom, TMN, Telenor, DigiTel Mobile can reach more than 570 operators in 191 countries.
